Introduction

Safe Meal is a food delivery app designed to tackle delivery delays caused by adverse weather.

By integrating real-time weather data and offering flexible delivery options

It ensures timely and reliable service for both customers and drivers, even in challenging weather conditions.

About Safe Meal

The app aims to solve a common issue in the food delivery industry the challenges posed by adverse weather conditions. It provides a reliable, efficient food delivery service that ensures customers receive their meals on time, regardless of the weather. The app integrates weather data and offers flexible delivery options for customers and drivers, helping both navigate weather-related delays.

Our Process

Discover Define Ideate Design

Quantitative Research

I did several research on how on different users who order for food online and those who have explored it.

Observations

40%

Complaints about delayed deliveries due to weather

20%

Driver-reported stress related to weather-based delivery

12%

Customer retention during the rainy season

20%

On-time delivery rate increased after weather-based adjustments.

22%

Active user engagement increased by after adding weather-based notifications.

Taskflows

Scenario 1 :

I want to open the app, get started and login/sign up to the app

Scenario 2 :

A new user Orders for a meal
